

HNDIT 2312 Software Engineering
2nd Year
Tutorial-3

1. Explain why the rapid delivery and deployment of new systems is often more important to businesses than the detailed functionality of these systems.
2. Explain how the principles underlying agile methods lead to the accelerated development and deployment of software.
3. What are the differences between Agile and traditional (Waterfall) Software development methodology?
4. Think of a “Learning Management System – LMS” like Moodle and write few user stories.
5. Consider one story in the above example(LMS) and write down story cards.
