

HNDIT 2312 Software Engineering
2nd Year
Tutorial-05

1. Describe three types of requirements which can be collected during requirement gathering and analysis phase” giving examples.
2. Write down four steps of requiremnt engineering process.
3. Briefly explain requirment validation techniques.
4. Summarize the following requirements in the form of a decision table.

If you feel hungry, and if you have money, you will eat from a restaurant. But then if you didn't have money, you will have to go home and eat. However you will not eat either way if you were not hungry.
